GitHub, Agile, Object Oriented Programing, Progressive Web Applications, Object-Relational Programming

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, Bulma, AJAX, React, Handlebars, Tailwind

Backend: MySQL, Sequelize, Express, NoSQL, Node, JSON, Bcrypt, Webpack, MongoDB, JWT

Projects

Dog and Cat Search Engine | Repo: <https://github.com/zencoh/soCrazyGroupProject> |

Deployed: <https://zencoh.github.io/soCrazyGroupProject/>

- This project lets a user choose what furry pet would be a good addition to their home.
- Using three api's this project presents a list of dogs and cats and depending on what breed the user selects, an image and short description of that pet is displayed. I was tasked with creating the api routes for this project along with leading daily scrum sessions and helping others divide up tasks.
- Tools/Languages: HTML5, CSS, Javascript, and Bulma (CSS Framework)

Rad-Libs | Repo: <https://github.com/SChafinIII/Rad-Libs> | Deployed: <https://rad-libs.herokuapp.com/>

- This application is a game similar to the childhood game mad-libs.
- Users are prompted with the option to choose between two templates then enter types of speech into the according blanks provided. A Rad-Lib is then created that the user can use to entertain a group. I was responsible for the client side javascript, login, logout, sign-up, and rad-lib form, along with creating the server, models, and a few handlebars files.
- Tools/Languages: Javascript, Node, Express, Sequelize, MySQL, Bootstrap, Bcrypt, and Handlebars

EzLeagues | Repo: <https://github.com/kcavner/Ezleagues> | Deployed: <https://ezleagues.herokuapp.com/>

- This application is a central hub for members of the community to view what intramural sports are being played in their area and join to promote physical and mental health.
- Using a NoSQL database to store sport data and a React front end to display this data to the browser that enables users to login or signup to engage in intramural sports in their local area. Users can also create teams, sports, and matches to play against others.
- Tools/Languages: NoSQL, React, Express, MongoDB, Tailwind CSS, and JWT
